Art Unit: 1714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guilbert et al.

Guilbert et al disclose coating compositions comprising microcapsules containing a corrosion inhibitor and a second fraction of microcapsules containing a film forming material which may be an epoxy resin. This epoxy resin is seen as meeting applicant's limitations to a hardenable substance. Suitable corrosion inhibitors taught by the reference at least overlap with those claimed instantly.

While the reference does not explicitly recite formulating lacquers, the discussion by the reference at column 3, 3rd paragraph and column 4, lines 47-56 is seen as rendering obvious the use of a lacquer as an application vehicle.

Claims 5-7 and 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
